▫ Library Management System

WORK EXPERIENCE

Frontend Developer

University Of Education

03/2022 - 07/2022

Achievements/Tasks

- Developed and maintained responsive and user-friendly websites using HTML, CSS, and JavaScript.
- Implemented modern design principles and optimized web pages for cross-browser.
- Integrated React.js into projects, enhancing the front-end interactivity and user experience.
- Learn about React Router to create a multi-page application with navigation. Build a multi-page portfolio website with different routes for projects, about me, and contact sections.
- I've adeptly navigated the realm of WordPress, building and managing websites with precision. I've tailored themes to match diverse brand identities, integrated plugins for enhanced functionality.

PERSONAL PROJECTS

Online Health Prediction System (03/2022 - 07/2022)

- This project is aimed at developing a health prediction system where people can search doctor related to their disease according to their location. The system can also book online appointment with the selected doctor

Library Management System (01/2022 - 03/2022)

- In library management, I architected an efficient system that seamlessly handled book cataloging, user management, and inventory control, Users experienced a user-friendly Search and Discovery interface and perform CRUD operation on it.
